

Georgia's Path to Recovery for K-12 Schools

Considerations and Recommendations for Georgia's Schools

The Georgia Department of Education, in partnership with the Georgia Department of Public Health, has developed guidance to support districts and communities in determining their plans and strategies for reopening schools. *Georgia's Path to Recovery for K-12 Schools* provides a tiered approach with clear, actionable steps that are advisable before students and employees return to school buildings, along with guidance that is applicable throughout the 2020-2021 school year.

This approach is built upon the guidance and recommendations of health officials; it is strongly aligned to the reopening guidelines that have been provided by our state and federal leaders; and it's designed to help districts prioritize the health and safety of students and teachers as they open school buildings and deliver instruction for the 2020-2021 school year.

Georgia's Path to Recovery for K-12 Schools focuses heavily on the health and physical requirements necessary for reopening school buildings. The Georgia Department of Education will continue to provide guidance and recommendations to districts and schools on navigating the academic, social, and emotional effects of the COVID-19 pandemic on students and employees.

Georgia's Path to Recovery for K-12 Schools provides considerations, recommendations, and best practices to ensure a safe and successful 2020-2021 school year. This guidance is not mandated, or state required. Local school districts have the authority and flexibility to meet their individual needs and be responsive to their communities. School leaders should engage and communicate with their students, staff, and communities in the development and implementation of their plans.

Practicing Prevention and Responding to COVID-19 in K-12 Schools

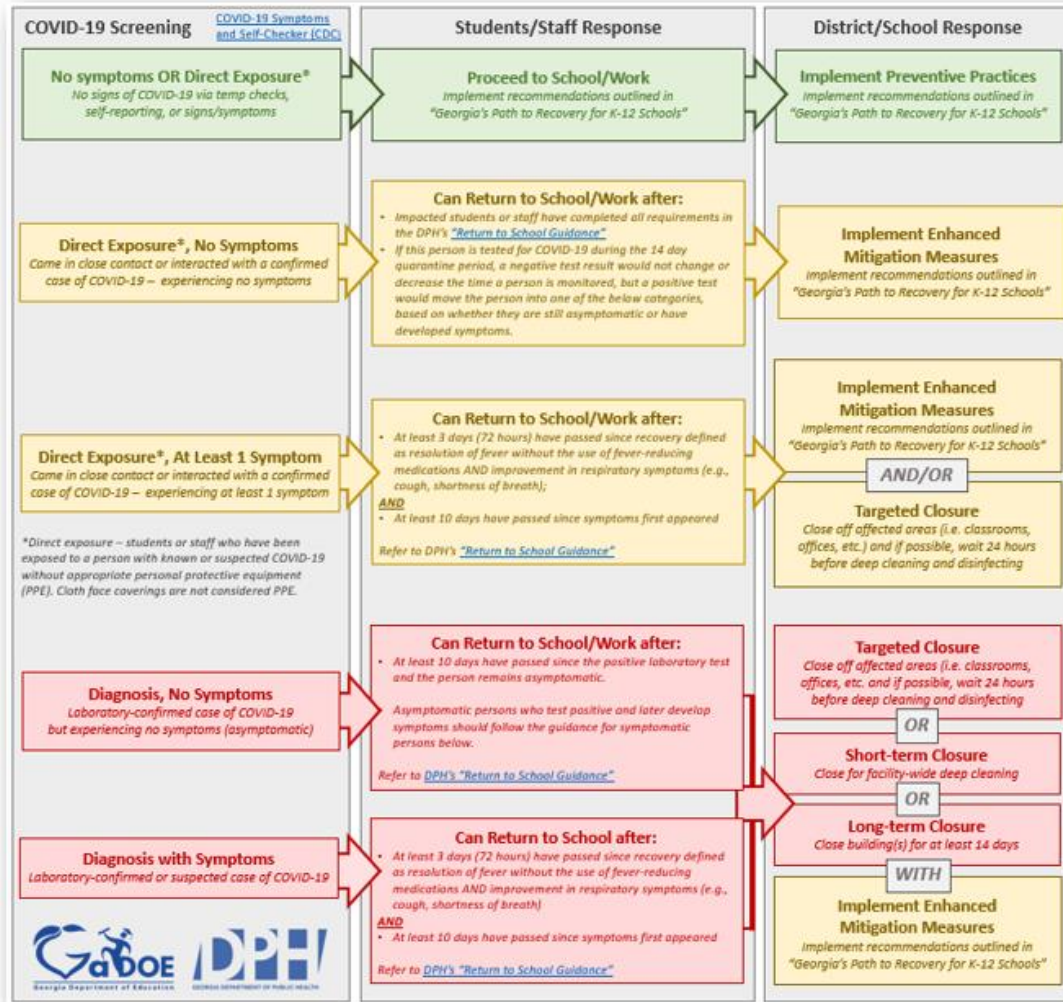

Levels are aligned to DPH's 'Return to School Guidance After COVID-19 Illness or Exposure' issued on June 13, 2020

Temporary Closure(s)	Enhanced Mitigation Measures	Preventive Practices
<ul style="list-style-type: none"> Consult with local and state DPH health officials Report closures to GaDOE Participate in contact tracing efforts and specimen collection efforts as directed by local health officials (to the extent feasible) Close off affected areas and if possible, wait 24 hours before cleaning and disinfecting. Determine partial or total closure by evaluating size and characteristics of student and staff populations, setting characteristics and environmental factors that affect transmission, increased absenteeism, and trends of suspected/confirmed cases of COVID-19 (see <i>Considerations for Temporary Closures</i>) Consider ways to accommodate needs of children, teachers/staff, and families at higher risk for severe illness (see <i>Protecting Vulnerable Populations</i> for considerations) <p>For additional guidance, see the CDC's Considerations for Schools</p>	<ul style="list-style-type: none"> Establish and maintain communication with local and state DPH health officials Participate in contact tracing efforts and specimen collection efforts as directed by local health officials (to the extent feasible) Implement enhanced social distancing measures (see <i>Transitioning, Large Group Gatherings, and Teaching and Learning</i>) Post signage in classrooms, hallways, and entrances to communicate how to stop the spread. COVID-19 symptoms, preventative measures (including staying home when sick), good hygiene, and school/district specific protocols Establish a protocol for students/staff who feel ill/experience symptoms when they come to school (see <i>When a Child, Staff Member, or Visitor Becomes Sick at School</i>) Isolate and deep clean impacted classrooms and spaces Consider ways to accommodate needs of children, teachers/staff, and families at higher risk for severe illness (see <i>Protecting Vulnerable Populations</i> for considerations) <p><i>Districts have the authority and flexibility to close school buildings and utilize distance/remote learning as needed.</i></p>	<ul style="list-style-type: none"> Establish and maintain communication with local and state DPH health officials Participate in contact tracing efforts and specimen collection efforts as directed by local health officials (to the extent feasible) Post signage in classrooms, hallways, and entrances to communicate how to stop the spread. COVID-19 symptoms, preventative measures (including staying home when sick), good hygiene, and school/district specific protocols Establish a protocol for students/staff who feel ill/experience symptoms when they come to school (see <i>When a Child, Staff Member, or Visitor Becomes Sick at School</i>) Consider ways to accommodate needs of children, teachers/staff, and families at higher risk for severe illness (see <i>Protecting Vulnerable Populations</i> for considerations)

DPH DOES NOT recommend using a test-based strategy for returning to school for children or adults (2 negative tests at least 24 hours apart) after COVID-19 infection. CDC has reported prolonged PCR positive test results without evidence of infectiousness. Although persons may have PCR-positive tests for up to 6 weeks, it remains unknown whether these PCR-positive results represent the presence of infectious virus. At this time, PCR positive specimens capable of producing disease have not been isolated more than 9 days after onset of illness.

Recommendations					
	<p>Per the Governor's Executive Order, the use of face coverings/masks is not mandated but is strongly recommended, particularly in settings where social distancing is difficult to accomplish (i.e. during hallway transitions, drop-off/pick-up, etc.). Information should be provided to staff, students, and families on proper use, removal, and washing of cloth face coverings. Any policy regarding face coverings should be sensitive to the needs of students and staff with medical issues that make the wearing of a face covering inadvisable.</p> <p>> CDC Guidance</p>		<p>Hand sanitizers should contain at least 60% alcohol and only used with staff and older children who can safely use hand sanitizer. Hand soap should be used for younger children.</p> <p>> CDC Guidance</p>		<p>Ensure safe and correct application of disinfectants and keep out of reach of children.</p> <p>> CDC Guidance</p>

Screening for and Responding to COVID-19 in K-12 Schools

School District Decision Tree

This [District Decision Tree](#) equips local school and public health leaders to mount a targeted response based on confirmed COVID-19 cases or exposures within a school community.

- CDC's [COVID-19 Symptoms and Self-Checker](#)
- DPH's [Return to School Guidance After COVID-19 Illness or Exposure \(reissued July 22, 2020\)](#)

Districts continue to have the flexibility to implement prevention strategies above and beyond the recommendations laid out in this guidance and adopt instructional models that best serve their students, teachers, and community.

[Click here to enlarge the 'Screening for and Responding to COVID-19 in K-12 Schools' District Decision Tree](#)

State and local public health officials may recommend that school districts adopt more enhanced mitigation strategies in response to community 'flare ups' or 'hot spots' of COVID-19 spread and in accordance with issued public health advisories.

Screening

Conducting regular screening for symptoms and ongoing self-monitoring throughout the school day can help reduce exposure. Teachers, staff, and students should be encouraged to self-monitor for symptoms such as fever, cough, or shortness of breath. If a student develops symptoms throughout the day, they MUST notify an adult immediately. More information on [how to monitor for symptoms](#) is available from the CDC.

Schools are **required** to:

- Enforce teachers, staff, and students stay home if:
 - They have tested positive for OR are showing COVID-19 symptoms, until they meet DPH’s “[Return to School Guidance After COVID-19 Illness or Exposure](#)”.
 - They have recently had close contact with a person with COVID-19, until they meet DPH’s “[Return to School Guidance After COVID-19 Illness or Exposure](#)”.
 - Advise positive or ill individuals of DPH’s home isolation criteria: <https://dph.georgia.gov/document/document/return-school-guidance/download>.
- Keep a daily log of teachers, staff, and students who a) did not attend school due to COVID-19-related illness or b) were sent home due to displaying COVID-19 symptoms and report cases to district public health officials (see [Map of Georgia Public Health Districts](#) and [Directory of Georgia District Health Directors](#)).

DPH Guidance

- [Quarantine Guidance: What to do if you were exposed to someone with COVID-19](#)
- [Isolation Guidance: What to do if you are sick with COVID-19](#)
- [Return to School Guidance After COVID-19 Illness or Exposure](#)

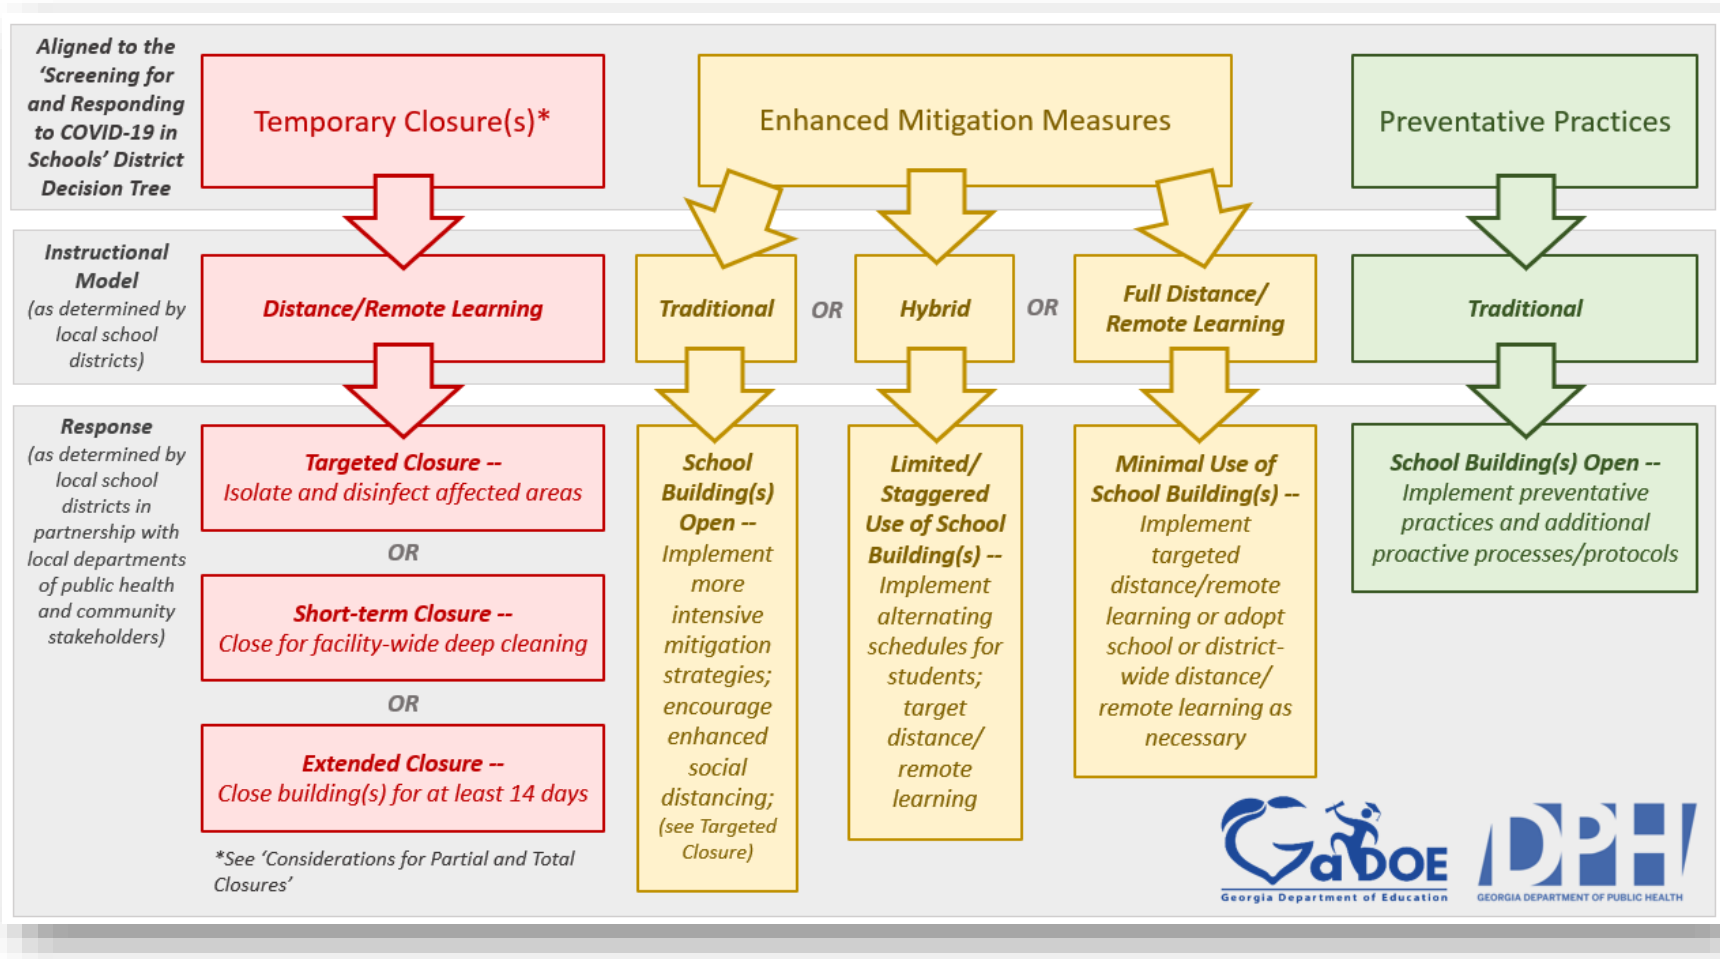

Considerations for Temporary Closure(s)

- When a student, teacher, or staff member tests positive for COVID-19 and has exposed others at the school, classrooms and office areas may need to close temporarily as students, teachers, and staff isolate and the area is cleaned.
- In consultation with the local public health department, the appropriate school official may decide whether school closure is warranted, including the length of time closure may be necessary. Consider the following when determining the need for partial or total closure:
 - Size and characteristics of student and staff populations (e.g., population includes individuals with special healthcare needs and/or who are at higher risk for severe illness)
 - Setting characteristics and environmental factors that affect transmission (e.g., length of school day, intensity of hands-on instruction, ability to maintain social distancing, need for/sharing of common equipment, physical spacing in classrooms, movement through buildings, proportion of time spent outdoors, involvement in activities that may be more likely to generate aerosols)
 - Possibility of spread to others, including to additional individuals outside of the facility (e.g., exposures at large assemblies, on field trips, at extracurricular activities that include students from other schools, on school buses that transport riders from multiple schools)
 - Absenteeism among educators, students, and/or staff that is high enough to limit the ability of the school to function effectively
 - High suspected number of cases or greater case rate within the educational setting compared to the case rate in the community
 - Additional indicators (e.g., increased absenteeism) that might suggest undiagnosed or unreported COVID-19-like activity among students or staff

See the District Decision Tree on page 5 of this document for a menu of responses.

Georgia's Path to Recovery for K-12 Schools

School District Decision Tree

Georgia's Path to Recovery for K-12 Schools not only provides considerations for school leaders as they develop their own plans for restarting school this fall but provides a flexible framework to address challenges that may develop throughout the 2020-2021 school year. Instead of a one-size-fits-all approach, the above District Decision Tree provides a menu of instructional models and responses districts can adopt to ensure the continued success and safety of students and staff members.

person instruction as these students often rely on daily routines and social interactions to address their individual learning needs.

- *A/B schedules*
 - *Alternating Days:* students would be divided into 2 groups, likely geographically. Groups would alternate face-to-face and virtual instruction during the week. One example: Group A would attend Monday and Tuesday and work virtually the remainder of the week. Group B would attend Thursday and Friday and work virtually the other days of the week. Wednesday would be a virtual day for most employees so buildings could be cleaned during the week between groups. Another example: Group A Students Monday/Wednesday and Group B Students -- Tuesday/Thursday; Friday – distance learning for all students, professional learning for staff, 'off' day and extend school year (districts set school calendars); using certification flexibility to relocate teachers as needed and allowable
 - *Alternating Weeks:* Group A Students – Week 1 and Group B Students Week 2; using certification flexibility to relocate teachers as needed and allowable
 - *Half Days:* AM/PM Schedule – consult with School Nutrition Director regarding best approach to serving school meals
- *Targeted Distance/Remote Learning*
 - *Elementary Face-to-Face with Secondary Distance Learning:* Prioritize 6-12 or 9-12 for continuous distance learning while other students have access to face-to-face instruction spread out across unused schools and classrooms; using certification flexibility to relocate teachers as needed and allowable; see *Serving Meals* under 'Confirmed Case(s)' for preparing/delivering school meals for students who are remote learning.

- Target interventions and supports:
 - Provide additional instructional supports to:
 - students at-risk of not graduating on time
 - students with disabilities (compensatory services)
 - students who struggled in the prior distance/remote learning environment (i.e. early grades, English Learners, etc.)
 - other students identified as being behind academically by teachers and parents.
 - Identify essential concepts/skills grade levels and provide access to enrichment (fine arts, music, world language, CTAE, computer science, AP/IB, dual enrollment, physical education/play, STEM/STEAM, etc.)
- Address learning loss:
 - Help students catch up/get ahead through the [Georgia Virtual School](#)
 - Provide extended learning opportunities through before/after school programs, Saturday school, etc.
- Prepare for potential future distance/remote learning by increasing current blended learning:
 - Develop a digital learning plan
 - Integrate virtual learning practices:
 - digitizing lessons
 - requiring a certain number of online assignments for each grading period
 - Provide virtual learning-specific professional learning for educators:
 - [Making the Shift to Online Teaching and Learning](#)
 - [Supporting Students with Disabilities Online](#)
 - Schedule specific planned district-/school-wide digital learning days as part of the traditional school calendar

See also GaDOE's [Pandemic Planning: Information for Public School Districts](#)

When a Child, Staff Member, or Visitor Becomes Sick at School

District/School Considerations:

- Work with school administrators, school nurses, and other healthcare providers to identify an isolation room or area to separate anyone who exhibits COVID-like symptoms.
- School nurses and other healthcare providers should use *Standard and Transmission-Based Precautions* when caring for sick people. See: *What Healthcare Personnel Should Know About Caring for Patients with Confirmed or Possible COVID-19 Infection*
- Establish procedures for safely transporting anyone who is sick home or to a healthcare facility.
- Notify local health officials, staff, and families immediately of a possible case while maintaining confidentiality consistent with the Americans with Disabilities Act (ADA) and other applicable federal and state privacy laws.
- Close off areas used by a sick person and do not use before cleaning and disinfection. Wait 24 hours before you clean and disinfect. If it is not possible to wait 24 hours, wait as long as possible. Ensure safe and correct application of disinfectants and keep disinfectant products away from children.
- Advise sick staff members and children not to return until they have met state DPH [criteria to discontinue home isolation and return to school guidance](#).
- Notify local public health immediately of any positive case of COVID-19 while maintaining confidentiality, as required under [FERPA](#) and state law related to privacy of educational records.
- Inform those who have had close contact to a person diagnosed with COVID-19 to stay home and follow state DPH guidance if symptoms develop. If a person does not have symptoms, follow appropriate state DPH guidance for home quarantine.
- Notify student's parents, staff, and teachers of any positive case of COVID-19 while maintaining confidentiality, as required under FERPA.

In partnership with the Georgia Department of Public Health, we created these guidelines to give school districts a blueprint for a safe reopening that is realistic in the K-12 setting. We have a responsibility to keep our students, teachers, school staff, and families safe and to provide the best possible education for our children.

Richard Woods, State School Superintendent
